New Therapies and Therapeutic Approaches in Multiple Myeloma

Message from the Guest Editors

Multiple myeloma (MM) is a hematological malignancy characterized by high tendency to relapse and to develop drug resistance. In recent years, the development and the use of monoclonal antibodies against different cell surface antigens overexpressed by MM cells such as CD38, SLAMF7, and BCMA has helped to change the therapeutic paradigm of MM. New possible therapeutic targets for immunotherapy or the use of CAR T cell technology are under clinical investigation, with very promising results. Moreover, selective drug inhibitors such as those anti-BCL-2 and MCL-1 apoptotic proteins or against the nuclear transport exportin (selinexor) are under experimental and clinical investigation. Combination treatment using both the main class of drugs as proteasome inhibitors and immunomodulatory drugs and monoclonal antibodies seems to extremely prolong the duration of the response of MM patients.

This Special Issue will address the most recent and relevant scientific findings regarding advances in the treatment of MM.

Guest Editors

Prof. Dr. Nicola Giuliani

Department of Medicine and Surgery, University of Parma, Via Gramsci 14, 43126 Parma, Italy

Dr. Francesca Gay

Myeloma Unit, Division of Hematology, University of Torino, Azienda Ospedaliero-Universitaria Città della Salute e della Scienza di Torino, 10126 Torino, Italy

Dr. Sara Bringhen

Division of Haematology, University of Turin, Turin, Italy

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
