Special Issue

Applications of Robotic Surgery in Thoracic Diseases

Message from the Guest Editor

The minimally invasive approach in thoracic surgery has already proven advantageous in terms of reduced postoperative pain, shorter immune response, quicker resumption of daily activities, and better aesthetic and functional results. However, the minimally invasive surgery took many years to be embraced as an effective procedure for the treatment of early stage NSCLC. The robotic approach in thoracic surgery (RATS) was developed as a technological evolution of videoassisted thoracoscopic surgery (VATS), leading to some technical advantages and to an innovative approach to lung cancer resection and staging, with a more precise dissection, and a theoretically better oncological result. Even if there are already many studies in literature about early post-operative outcomes, few studies have been published about oncological results.

Within this Special Issue in the Journal of Clinical Medicine, we want to invite you to describe the latest state-of-the-art robotic approaches in lung cancer disease and to gather large-scale studies to help diffuse the results of this innovative approach, in particular focusing attention on long-term oncological outcomes.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
