

Special Issue

New Insights and Clinical Management of Thyroid Diseases

Message from the Guest Editors

Thyroid diseases are the most common disorders of the endocrine system and their incidence has rapidly been increasing. Therefore, there is an urgent need for research into their pathogenesis, particularly in relation to the molecular basis, as well as for the improvement of diagnostics and for the implementation of new treatment methods. The aim of this Special Issue is to present new insights into and research on the clinical management of thyroid diseases. We would be pleased to receive interesting articles in different fields of thyroidology. We would be particularly pleased to receive studies, both clinical and experimental, concerning thyroid gland diseases in children, pregnant women, and elderly persons. We hope to provide readers of our Special Issue with a broad understanding of these topics. Prof. Dr. Andrzej Lewiński

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
