Transcatheter Mitral and Tricuspid Valve Repair: Advances and Challenges

Message from the Guest Editors

Mitral regurgitation is the most common valvular abnormality, thought to affect over 2% of the world population, and is the second most frequent indication for valve surgery, following aortic stenosis. Data concerning tricuspid regurgitation is limited, but we know that this “forgotten valve” has immense independent impact on patient prognosis.

Advancements in the diagnosis, medical management, and percutaneous therapy of both mitral and tricuspid regurgitation in recent years have completely changed the way we are able to manage these patients. However, there is much yet to learn on the future of transcatheter mitral and tricuspid valve repair. We are very excited to serve as the for a Special Issue of the *Journal of Clinical Medicine* and invite you to submit novel research publications related to transcatheter therapies of both mitral and tricuspid regurgitation. We would like to invite state-of-the-art reviews as well as original research articles in this area to be considered for inclusion in this Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
