Transcatheter Mitral and Tricuspid Valve Repair: Advances and Challenges

Message from the Guest Editors

Mitral regurgitation is the most common valvular abnormality, thought to affect over 2% of the world population, and is the second most frequent indication for valve surgery, following aortic stenosis. Data concerning tricuspid regurgitation is limited, but we know that this “forgotten valve” has immense independent impact on patient prognosis.

Advancements in the diagnosis, medical management, and percutaneous therapy of both mitral and tricuspid regurgitation in recent years have completely changed the way we are able to manage these patients. However, there is much yet to learn on the future of transcatheter mitral and tricuspid valve repair. We are very excited to serve as the for a Special Issue of the *Journal of Clinical Medicine* and invite you to submit novel research publications related to transcatheter therapies of both mitral and tricuspid regurgitation. We would like to invite state-of-the-art reviews as well as original research articles in this area to be considered for inclusion in this Issue.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2026).
