Diagnosis, Treatment and Management of Trauma-Induced Coagulation Disorder: Current Updates and Perspectives

Message from the Guest Editors

Exsanguination in severely injured trauma patients continues to be a significant cause of early in-hospital mortality. Many of these patients suffer from trauma-induced coagulopathy (TIC), which might result in an uncompressible microvascular bleeding disease. Despite tremendous advances in the understanding of the pathophysiology of TIC, a variety of unanswered questions persist and need to be addressed in future studies.

In this Special Issue of the Journal of Clinical Medicine, we would like to offer researchers a platform to share recent scientific findings in the context of severely bleeding and coagulopathy trauma patients.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
