

Special Issue

Complications, Diagnosis and Treatment of Angina

Message from the Guest Editors

It is my great pleasure to introduce you to all the exciting Special Issue on "Complications, Diagnosis and Treatment of Angina". Despite continuous improvements in medical field, ischemic heart diseases (CHD) remain the leading cause of mortality and morbidity in the industrialized world. The principal goals in the care of patients with CHD are to secure diagnosis, assess the extent of disease, relieve symptoms, and prevent future cardiac events. This Special Issue welcomes submissions in this field, addressing how innovative diagnostic and therapeutic strategies can optimize the management of patients with angina, comprising its most atypical forms. Beyond specialists from cardiology, researchers with a focus on imaging, inflammation, physiology, machine learning, or other affiliated disciplines are also invited to submit original articles or reviews in their area of expertise in order to enhance the awareness of the management of patients with angina, treating CHD and preventing its complications, also including special subpopulations such as diabetes and chronic kidney disease patients.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
