

## Special Issue

# Current Practice and Future Perspectives in Ablation of Atrial Fibrillation

### Message from the Guest Editor

Atrial Fibrillation (AF) is the most common cardiac arrhythmia and is responsible for increased stroke risk, heart failure and all-cause mortality. Catheter ablation of AF has emerged as the most efficacious treatment to maintain sinus rhythm and has to be considered in symptomatic patients, certainly after AF recurrence despite antiarrhythmic medication. This is particularly the case for Pulmonary Vein Isolation, which remains the gold standard for any AF procedure and which has been shown to be much more efficient and durable than before. This also seems to be the case for ablation outside PV isolation, which is sometimes necessary to potentially improve the outcome of some patients presenting with persistent AF or left-sided flutters.

This special issue will discuss the different aspects of the actual results and expectations from AF ablation and the potential improvements for the future. *Please click [here](#) to find information!*

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
