Current Practice and Future Perspectives in Ablation of Atrial Fibrillation

Message from the Guest Editor

Atrial Fibrillation (AF) is the most common cardiac arrhythmia and is responsible for increased stroke risk, heart failure and all-cause mortality. Catheter ablation of AF has emerged as the most efficacious treatment to maintain sinus rhythm and has to be considered in symptomatic patients, certainly after AF recurrence despite antiarrhythmic medication. This is particularly the case for Pulmonary Vein Isolation, which remains the gold standard for any AF procedure and which has been shown to be much more efficient and durable than before. This also seems to be the case for ablation outside PV isolation, which is sometimes necessary to potentially improve the outcome of some patients presenting with persistent AF or left-sided flutters.

This special issue will discuss the different aspects of the actual results and expectations from AF ablation and the potential improvements for the future. *Please click [here](#) to find information!*
Welcome to contribute!

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
