New Trends in Urethral Reconstruction

Message from the Guest Editor

In the past two decades, the field of urethral reconstruction has made great leaps. Not only have new graft tissues been introduced which are now standard, and not only have new techniques been developed to address even the most severe strictures, but there is also a growing number of specialized reconstructive urologists increasing the availability for state-of-the-art urethral reconstruction. As the number of urethral reconstructions increases, so does the evolution of the field and its techniques. In the past several years, many notable variations of established surgeries have been published that show improved outcomes. Additionally, while reconstructive urologists turn their attention to following outcomes of their surgeries in more detail, we are obtaining a more and more refined view of how best to improve our patients' lives. This Special Issue on new trends in urethral reconstruction is intended to provide a collection of new and updated techniques presenting state-of-the-art guidance to optimize urethral reconstruction.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
