## **Special Issue**

## Regeneration of Chronic Tympanic Membrane Perforations: Treatments, Challenges and Emerging Therapeutics

### Message from the Guest Editors

To date, regeneration of chronic tympanic membrane perforations is considered standard care in patients with chronic otitis media (COM). Over the past few years, the development of new technologies such as tissue engineering, 3D printing, and bioprinting have been shown to result in better outcomes in terms of regeneration research. This has resulted in the use of a variety of scaffolds, stem cells, bioactive molecules, imaging modalities, and acousticomechanical analysis. So far, the majority of studies have been limited to the research field. The number of clinical indications in which the tissue engineering approach is applied keeps expanding. This Special Issue of the *Journal of Clinical Medicine* will provide the current trends in regeneration of chronic tympanic membrane perforations.

### **About the Journal**

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### **Editors-in-Chief**

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

### **Author Benefits**

#### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
