Advances in Glaucoma Management and Intraocular Pressure Physiology

Message from the Guest Editor

Recent years have been a time of unprecedented progress in the field of glaucoma, there are still important unmet needs to address. First, although glaucoma is characterized by the premature apoptosis of retinal ganglion cell, to date, intraocular pressure regulation remains the central target of all approved glaucoma treatments. Although pressure-lowering treatments prevent vision loss in glaucoma, pressure-independent neuroprotective therapies are widely regarded as an unmet need in the specialty. Then, while intraocular pressure control remains the cornerstone of glaucoma management, there is growing evidence that traditional in-clinic tonometry does not reflect the dynamic nature of intraocular pressure. As reports suggest that intraocular pressure variations may play a role in glaucoma progression, translational research in ocular biomechanics, aqueous outflow physiology and pressure telemetry will be essential to guide accurate clinical decisions. Finally, although the wide armamentarium of techniques available to glaucoma surgeons provide remarkable flexibility in the management of glaucoma, there is yet no clear consensus guiding minimally invasive treatment choices.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
