

Special Issue

Treatment of Atopic Dermatitis, 2nd Edition

Message from the Guest Editors

It is my pleasure to invite you to contribute a paper to this Special Issue, entitled “Treatment of Atopic Dermatitis, 2nd Edition”, following on from the first edition wherein we published eight papers. For more details, please

visit: https://www.mdpi.com/journal/jcm/special_issues/KD1THSMO7W. Atopic dermatitis is a chronic

inflammatory skin disease. Advances in the discovery of new therapeutic targets have allowed for the development of molecules with therapeutic potential.

The reality is that there is a therapeutic paradigm shift in atopic dermatitis; therefore, it is necessary to stay updated in relation to the results observed in real clinical practice experience. It is also necessary to learn about new clinical trials and new potentially therapeutic molecules; for example, biological therapy promises new additions such as nemolizumab or lebrikizumab.

Currently, new JAK inhibitors are being studied, although none appear to be ready to be incorporated in the short term. This special edition, titled Treatment of Atopic Dermatitis, will attempt to cover the scope of any potentially useful treatment for this disease.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
