Audiology and Phoniatrics in Head and Neck Surgery: Functional Assessment, Rehabilitation Strategies, and Quality of Life Outcomes

Message from the Guest Editor

The integration of audiological and phoniatric expertise in head and neck surgery has become increasingly crucial as we strive to optimize functional outcomes and quality of life for our patients. Modern head and neck surgical interventions, while achieving excellent oncological and therapeutic results, often present complex challenges regarding voice preservation, hearing conservation, and speech rehabilitation. This Special Issue focuses on the critical intersection between surgical excellence and functional preservation, emphasizing the audiological and phoniatric perspectives that are essential for comprehensive patient care. We welcome original research articles, reviews, systematic reviews, and meta-analyses that provide evidence-based insights into the audiological and phoniatric management of head and neck surgical patients.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
