Emerging Diagnosis and Therapies for Psoriasis and Chronic Inflammatory Skin Disorders

Message from the Guest Editors

Psoriasis and chronic inflammatory skin disorders pose a major global health burden and significantly affect patients' quality of life. Advances in immunology and translational research have improved understanding of disease mechanisms and led to targeted therapies. At the same time, emerging diagnostic tools, including biomarkers, imaging, digital health technologies, and artificial intelligence, are reshaping clinical practice. Despite progress, unmet needs remain, such as early diagnosis, prediction of treatment response, long-term safety evaluation, and comorbidity management. Disease heterogeneity and real-world complexity highlight the need for integrated, personalized approaches. This Special Issue focuses on recent advances in diagnostic strategies and therapeutic innovations for psoriasis and chronic inflammatory skin disorders. We welcome original research, reviews, clinical trials, real-world evidence, and technological developments that advance clinical care and patient outcomes.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2026).
