# Mitral Valve Surgery: Current Status and Future Challenges

### Message from the Guest Editors

The treatment of mitral valve disease remains dynamic..... To date, no particular technique has definitively demonstrated superiority relative to another, and the benefits of minimally invasive and robotic mitral valve surgery are still a point of debate.

In this scenario, recently, there has been a rapid adoption and implementation of transcatheter alternatives for mitral valve disease, including transcatheter edge-to-edge repair, transapical neochordal implantation and percutaneous annuloplasty (directly, or indirectly through coronary sinus remodeling). Finally, transcatheter alternatives for mitral valve replacement are emerging.

The aim of the present Research Topic is to give the latest evidence or new findings regarding the different approaches in cases of mitral valve repair (resectional vs non-resectional techniques, sternotomy vs minimally invasive/robotic surgery) or replacement (focusing on different surgical prostheses available); manuscripts within this area of research will be accepted.

Moreover, an analysis of transcatheter alternatives and comparison between the results of surgical or transcatheter techniques is encouraged for submission.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
