

Special Issue

Management of Heart Failure

Message from the Guest Editors

Heart failure represents a significant medical condition. The proper evaluation and treatment of heart failure are important to improve quality of life and extend survival.

In this Special Issue we would like to focus on the comprehensive evaluation and management of heart failure, including non-pharmacological therapy, like heart surgery, electrophysiology procedures, device implantation, and percutaneous coronary interventions, starting with ethical concerns and moving to practical issues. We also wish to integrate the role of clinical medicine's assistance and its function in adhering to social-distancing guidelines, and we would like to invite the submission of research articles and reviews.

Keywords

- heart failure
- revascularization
- device implantation
- resynchronization therapy
- implantable cardiac defibrillator
- contractility modulation
- mitra-clip

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
