# Special Issue

# Vascular Surgery: Current Status and Future Perspectives

# Message from the Guest Editors

Vascular surgery is a subspecialty of surgery focusing on the treatment of the arterial and venous systems of the body outside of the coronary and skull beads. A vascular surgeon is trained to treat every artery and vein, from their patient's neck to their toes, that lies outside of the brain and heart. This is a wide-ranging field filled with multiple pathologies, from atherosclerotic disease to aneurysmal disease and rheumatologic disease, as well as a vast array of other conditions that can affect the human vascular system. Vascular surgery has recently experienced a renaissance in its treatment algorithms with the introduction of minimally invasive and catheterbased techniques. This novel approach to treatment of the vascular system has opened the door for vascular surgeons to offer life-saving and curative procedures to even the most sick and frail of patients. Through this Special Issue, we hope to demonstrate and analyze the current treatment modalities for various vascular pathologies in light of recent technological advances.

# About the Journal

# Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## **Editors-in-Chief**

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

#### **Author Benefits**

# **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

## **Journal Rank:**

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

# **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
