Craniofacial Surgery: State of the Art and the Perspectives

Message from the Guest Editors

The beginning of modern craniofacial surgery is attributed to Paul Tessier, who, in the 1960s, applied concepts such as craniofacial approaches, osteotomies, and autogenous bone grafts to correct craniosynostosis and skeletal deformities. The introduction of piezosurgery improved the precision of osteotomies, reducing damage to the surrounding soft tissues. Finally, microsurgery enhanced the craniofacial surgeon's arsenal in the treatment of head and neck tumors, as well as in skeletal reconstructions following severe facial trauma. With the dawn of the new millennium, craniofacial surgery has rapidly evolved with the introduction of minimally invasive endoscopic procedures, bone distraction, three-dimensional (3D) imaging, computer-assisted treatment, virtual surgical planning, and 3D printing. In this Special Issue, I invite authors to submit articles on the state of the art of and perspectives on craniofacial surgery.

- craniofacial deformities
- osteotomy
- plate osteosynthesis
- piezosurgery
- microsurgery

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
