

Special Issue

Advances in Lung Transplantation and Interventional Pulmonology

Message from the Guest Editors

The Special Issue “Advances in Lung Transplantation and Interventional Pulmonology” aims to explore the latest developments in lung transplantation and related interventional pulmonology procedures. It will cover a range of topics, including innovative surgical techniques, novel immunosuppressive strategies, advancements in diagnostic tools, and emerging therapeutic approaches. This issue will also address critical challenges such as organ rejection, post-transplant complications, and the growing demand for donor lungs. By highlighting state-of-the-art research, clinical practices, and case studies, this collection seeks to provide valuable insights for healthcare professionals and researchers in both pulmonology and transplant medicine. Contributions will encompass multidisciplinary perspectives from the field, making this issue a comprehensive resource on the current and future directions in lung transplantation and interventional pulmonology.
