

Special Issue

Advances in Clinical Trials and Evidence Synthesis (CTES)

Message from the Guest Editors

Clinical and epidemiological research provides an evidence foundation for healthcare decision making. The quality of evidence largely relies on whether the methodology in research is rigorous. While recent years have seen remarkable progress in clinical research methodology, problems remain common in study design, in conducting and reporting clinical trials, real-world studies, and evidence synthesis, which may bias study results and mislead decision making. It is important to develop novel methods to address the methodological problems. In this Special Issue, we would like to create a forum for high-quality research and review papers on methodology to improve the quality of clinical trials, real-world studies, and evidence synthesis. The following topics will be of special interest:

- Methodological problems in study design, in conducting or reporting clinical trials, real-world study, and evidence synthesis
- Progress in methods of study design, conducting or reporting clinical trials, real-world study, and evidence synthesis
- Application research using advanced methods in clinical trials, real-world studies, and evidence synthesis

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
