

## Special Issue

# Advanced Hepato-Pancreato-Biliary Surgery: Clinical Innovations and Improved Outcomes

### Message from the Guest Editors

This issue delves into the transformative advancements reshaping the landscape of hepatobiliary and pancreatic (HPB) surgery, focusing on the synergistic interplay between innovative surgical techniques, perioperative clinical care optimization, and refined prognostication methods.

First, we solicit contributions detailing advancements in minimally invasive surgical techniques, including but not limited to laparoscopy, robotics, and single-incision surgery. A second key area of focus will be on optimizing perioperative clinical care. We welcome submissions detailing innovative strategies to expedite recovery and minimize postoperative complications. Finally, the issue will address the critical need for more precise prognostication in HPB surgery. We invite submissions presenting research on advanced prognostic biomarkers, novel risk stratification models, and the application of machine learning techniques to improve the prediction of treatment response, recurrence rates, and overall survival. Studies comparing the efficacy of different prognostic tools and their impact on treatment decisions will be particularly valuable.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
