

Special Issue

Recent Advances in Imaging and Interventional Techniques for Renal and Adrenal Diseases

Message from the Guest Editors

This Special Issue aims to present recent advances in the diagnosis and treatment of renal and adrenal pathologies. The impressive refinements in diagnostic and therapeutic techniques in this field make this a topic of the utmost importance. Multimodality and tailoring are key to achieving the successful treatment of these diseases, for which many steps forward have been achieved in recent years. For this reason, original articles that highlight the results of advanced techniques to better characterize and treat these pathologies are welcome, especially those focusing on the technological advancements of imaging, robotic surgery, and minimally invasive techniques. Review articles are also welcome, and research in general with the aim of providing comprehensive knowledge on cutting-edge techniques and minimally invasive treatments will be considered for publication. Lastly, articles on the potential role of artificial intelligence (AI) and big data, as well as their future perspectives, may be considered for publication in this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
