Risk Prediction for Gynecological Cancer

Message from the Guest Editor

Risk prediction for gynaecological cancer is crucial for the early prevention, timely diagnosis, and effective treatment of cervical, endometrial and tubo-ovarian cancers. These cancers pose significant health threats to women worldwide, and understanding risk factors and tools to achieve early diagnosis can help researchers to reduce their incidence and mortality rates. Cervical cancer risk prediction relies heavily on screening and vaccination. Human papillomavirus (HPV) is the primary cause, so regular pap smears and HPV testing are essential, and screening programs and new assessments should be incorporated in clinical practice worldwide. Endometrial cancer, primarily affecting postmenopausal women, is often linked to obesity, diabetes, hypertension, and hormonal imbalances. Ovarian cancer presents the greatest challenge due to its often-late diagnosis and subtle early symptoms. This Special Issue will highlight recent advances in the context of diagnosis, treatment, and the prediction of prognosis for these malignancies.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
