

## Special Issue

# Clinical Advances in Corneal and Refractive Surgery for Keratoconus

### Message from the Guest Editors

In recent years we have observed an increasing interest for the diagnosis and treatment of keratoconus. The therapy aims to maintain or improve visual acuity and the corneal cross-linking (CXL) is actually the most performed procedure to halt the ectasia progression. Progress in refractive surgery has enabled the use of treatment protocols based on CXL and surface ablation procedures to improve visual function. CXL performed using different protocols combined with photorefractive keratectomy or implantation of intracorneal rings represents a new approach in the management of corneal ectasia. At the same time the successful use of femtolasers in corneal surgery both refractive and therapeutic, opened new horizons for keratoconus treatment. In this special issue we invite authors to submit articles on surgical advances in corneal surgery and refractive procedures performed in different stages of keratoconus. We encourage the authors to share their experience and the results of corneal cross linking protocols and surgical procedures used in keratoconus management.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
