New Insights in Management of Constipation

Message from the Guest Editor

Constipation is one of the most frequent gastrointestinal symptoms exposing patients to severe health impairment, decreased quality of life, and psychological distress. The management of constipation is a major challenge due to its high prevalence and lack of widespread specialist expertise. This Special Issue will mainly focus on the hot topics of constipation management to exhibit the latest results from diagnosis to treatment (nonoperative therapy or operative therapy). Original research articles are especially welcome, demonstrating innovative findings with the potential of enhancing the clinical capability of diagnosing and treating constipation among different patient groups. Additionally, submissions of high-interest review articles are encouraged.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
