# Clinical Management of Audiological Disorders: Outcome Measure in Demanding Listening Situation after Cl Provision

## Message from the Guest Editors

Profound sensorineural hearing loss can be successfully treated with cochlear implants. In recent decades, great success has been achieved for this device when used in quiet environments. However, cochlear implant (CI) users still face challenges in everyday communication. These include, for example, soft or distant speech. reverberation, interference of speech by sounds with different temporal characteristics, and varying numbers and locations of interfering signals. There are a variety of approaches to address this challenge, including digital signal processing algorithms, bilateral and bimodal provision, electro-acoustic stimulation, etc. Furthermore, research methods utilized to study this topic include, e.g., psycho-acoustics, speech audiometry, virtual acoustics, data-logging, and questionnaires. This Special Issue aims to share the current state of the art in the management of everyday listening challenges and highlight possible solutions.

# About the Journal

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### **Editors-in-Chief**

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

#### **Author Benefits**

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### **Journal Rank:**

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
