Clinical Application of Cardiac Pacemakers and Implantable Cardioverter Defibrillators

Message from the Guest Editor

What pulsed field ablation is to the treatment of atrial fibrillation is what conduction system pacing is to device therapy. Physiological pacing represents the way to a promising future in cardiac device therapy and will hopefully serve as the basis for numerous large-scale prospective and randomised studies in the next few years. In addition, thanks to the progress in leadless pacing, we now have the opportunity to expand the range of indications—here, too, we are looking forward to the first long-term results for the leadless dual-chamber pacemaker and procedure-related outcomes. In addition to the implantation of cardiac devices and leads, the number of lead extractions is also increasing along with the number of patients, the age of these patients, and the number of associated complication risks. These interventions, which still represent interventions with an increased complication risk for patients, have become much more relevant and are bound to centres due to their complexity and the need for expertise. Different extraction tools have steadily evolved over the last decade and significantly reduced the risk of mortality.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
