

Special Issue

Thoracic Surgery: Current Practice and Future Directions: 2nd Edition

Message from the Guest Editor

This Special Issue aims to collect new evidence on the safety, efficacy, and reproducibility of minimally invasive techniques, such as Uniportal-VATS and RATS, in lung, mediastinal, and esophageal diseases. It also aims to delve deeper into the results of new integrated oncological strategies, such as the role of immunotherapy in neoadjuvant therapy protocols. This Special Issue will also look into innovative management in thoracic anesthesiology and loco-regional blocks for pain management during minimally invasive approaches. Original research articles and reviews are welcome. Their research areas may include (but are not limited to) the following:

- Current evidence on NSCLC's pathogenesis, modern strategies for integrated treatments, and future perspectives;
- Novel endoscopic, diagnostic, and therapeutic techniques in thoracic surgery;
- Minimally invasive thoracic surgery (VATS and RATS);
- New anesthesiology and pain management strategies in thoracic surgery.

I look forward to receiving your contributions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
