Vaccine against COVID-19: Current State of the Art and Future Perspectives

Message from the Guest Editor

Although COVID-19 vaccines have been extensively used around the world, millions of cases are still diagnosed every day, contributing to the decreased effectiveness of the vaccine and strain variations. Therefore, it is still imperative to formulate a scientific immunization strategy based on the current COVID-19 vaccines and design and develop the next generation of vaccines. A thorough evaluation of how different COVID-19 vaccines were developed is valuable:

(1) The continued scientific, normative, and comprehensive clinical evaluation of COVID-19 vaccines with antigens originating from wild strains as well as variant strains against VOC;

(2) The development of a safe and effective heterologous prime-boost strategy which may to some degree draw on the strengths of different technology platforms and induce a rich immune response;

(3) A deeper understanding of the importance of new adjuvants and analysis of their synergistic mechanisms applied to vaccines.

We aim to present the latest developments of clinical studies on COVID-19 vaccines and gather promising research or perspectives on the design of next-generation COVID-19 vaccines and immunization strategies.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
