Venous Thromboembolism – Diagnosis, Prevention and Treatment

Message from the Guest Editors

Venous thromboembolism (VTE), which includes deep vein thrombosis (DVT) and pulmonary embolism (PE), is an important cause of morbidity and mortality worldwide. Several major innovations have changed the landscape of VTE diagnosis, prevention, and treatment. Developments in clinical prediction rules and imaging techniques have led to improved accuracy in the diagnosis of VTE, but the liberal use of imaging techniques, such as computed tomography, has raised questions about the overdiagnosis of clinically irrelevant events. Until recently, heparins and vitamin K antagonists (VKAs) were the cornerstones for prevention and treatment of VTE. Representing a major advance in anticoagulant therapy, the advent of direct oral anticoagulants has changed the balance between efficacy, safety, and convenience for patients, resulting in improved outcomes for patients and expanding indications. In this Special Issue, we critically review advances made in the diagnosis, prevention, and treatment of VTE, highlight unmet needs, and discuss future research directions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
