Latest Research Advances in Vulvar Disease

Message from the Guest Editor

Compared to other gynecologic conditions, vulvar diseases are rare. Thus, research in this area is scarce. Advances in understanding the pathomechanisms of vulvar diseases are of crucial importance. The majority can be cured with locally applied antibiotics, but some of them suffer from different conditions. Besides inspection, supplemented by vulvoscopy, biopsy samples are helpful in identifying the correct diagnosis. As the conditions are wide-ranging, treatment has to be many-sided: in non-malignant vulvar diseases, locally applied cremes, solutions, and tinctures are indicated, while in pre-malignant and malignant disease, surgery is the only promising cure. The radicality of the surgical procedures has recently been reduced. This is true both for groin lymph node dissection where, in some cases, sentinel lymph node excision is possible, and tumor-free margins where less healthy tissue is required in the surgical specimen than even a few years ago. Awareness of vulvar diseases has begun to grow among gynecologists, but it also has to increase in clinicians of other medical disciplines.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
