Clinical Challenges and Advances in Shoulder and Elbow Surgery

Message from the Guest Editor

Shoulder and elbow surgeries, including arthroscopy, arthroplasty, and open surgery, have advanced over the last decade. Advances in arthroscopic techniques and instruments improved not only clinical outcomes but also the diagnostic accuracy. Advances in arthroplasty techniques and implants improved clinical outcomes and long-term survival rate and decreased the rate of complications. Advances in open surgery, including the transfer and reconstruction of soft tissue (tendon, ligament, and capsule), expanded treatment options for shoulder and elbow disorders. With this Special Issue, we encourage the submission of cutting-edge research, including clinical challenges and advances in shoulder and elbow surgery. We believe that this Special Issue will provide readers with new knowledge of the treatment for shoulder and elbow disorders. **Keywords:** shoulder surgery; elbow surgery; arthroscopy; arthroplasty; open surgery; biologics

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
