Clinical Care and Rehabilitation for Neuromuscular Diseases

Message from the Guest Editor

Neuromuscular diseases comprise a heterogeneous group of disorders whose main common feature is progressive or non-progressive muscle weakness. According to a classification by Sir John Walton, there are around 800 different forms of these diseases, which can be divided into diseases of the muscles, diseases of the peripheral nerves and anterior horn cells, and neuromuscular junction. While these diseases used to play an outsider role in neurology, advances in modern medicine and neuroscience, especially in molecular genetics, have led to ever better diagnostic and therapeutic options, even for some diseases with a previously poor prognosis, so that the best possible clinical care and rehabilitation of these diseases now play a major role. For this reason, in this upcoming Special Issue, we want to focus on current scientific aspects of modern clinical care and rehabilitation for all forms of neuromuscular diseases. Clinicians and scientists are cordially invited to submit original research papers or state-of-the-art reviews.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
