New Advances in Cataract and Refractive Surgery

Message from the Guest Editor

Cataract and refractive surgeries are some of the most commonly performed surgical procedures in ophthalmology. In recent years, with the progress of new technologies, ophthalmologists have tried to provide safer, more advanced treatment with as few preoperative and postoperative complications as possible. In this Special Issue, we aim to present a broad range of topics covering the diagnosis, preoperative treatment, treatment and surgery, and the postoperative management of patients undergoing cataract and refractive surgeries. The future perspective of methods for this medical treatment, especially managing patients with other comorbidities and complications, is a significant part of our Special Issue. We hope to summarize the advantages and faults of this important procedure in medical practice. Therefore, researchers in the field of cataract and refractive surgeries are encouraged to submit their findings as original articles or reviews to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
