Special Issue

Alopecia Areata: From Diagnosis to Treatment

Message from the Guest Editors

Alopecia areata (AA) has been receiving increasing scientific attention in recent years. The reports of AA onset and reacutization after COVID-19 infection and vaccination shed new light on the pathogenesis of this disease and its possible triggers and worsening factors. Moreover, the introduction of Janus kinase (JAK) as a new effective treatment paved the way for a new therapeutic era for a disease whose therapies were often off-label and not always satisfactory. Nevertheless, this is just the beginning and there is still a lot to know about the mechanisms underlying AA, about how new therapies work and how they can give the best results. In this view, old and new diagnostic tools will be crucial for identifying the different pathogenic moments and for monitoring therapeutic progress. In this Special Issue, we welcome authors to submit papers on any aspect of alopecia areata in order to be part of a new chapter of the story of this disease and to help improve the quality of life of affected patients.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès
Internal Medicine Department, University Hospital Strasbourg, 67081 Strasbourg, France

Prof. Dr. Kent Doi
Department of Emergency and Critical Care Medicine, The University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:
JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
