What We See through Cardiac Imaging

Message from the Guest Editors

Whether for routine examination or following a cardiac event, there are several modalities to evaluate cardiomyopathies. Cardiac imaging has many possibilities through the accurate identification of structural modifications and trends in measurements and dynamic alterations, which are key to ensuring timely and lifesaving therapies are provided. Patients with cardiomyopathies sometimes live a long part of their lives facing problems such as life-threatening arrhythmias, progressive heart failure and increased risk of sudden cardiac death. What to do and how to use different imaging modalities in different clinical scenarios in cardiomyopathies is of utmost importance to ensure patients a good quality of life and prognosis. “What we see through cardiac imaging” welcomes original articles that empathize with the role of the multimodality approach to provide a complete view of the patient’s cardiovascular system in every specific condition related to cardiomyopathy. **Keywords**

- cardiomyopathies
- multimodality imaging
- echocardiography
- cardiac-computed tomography
- cardiac magnetic resonance
- prognosis
- arrhythmias
- heart failure

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
