Spinal Deformity: Diagnosis, Complication and Treatment in Adolescent Patients

Message from the Guest Editor

Idiopathic spinal deformities in the adolescent population are generally afflicting millions of patients. Including idiopathic adolescent scoliosis (AIS) and hyperkyphosis (idiopathic or in Scheuermann disease). If untreated, the progression of deformities can lead to back pain, spinal decompensation, pulmonary function limitations and changes in appearance associated with psychological distress. In the last few years, clear guidelines for the diagnosis of the pathology have been published in the medical literature and are generally followed by all health figures involved in the management of this complex disease. However, clear and universally accepted guidelines are still lacking for both the conservative and surgical treatment of spinal adolescent deformities. This Special Issue, which will include original papers and reviews, aims to provide an updated overview of the latest advances in the diagnosis methods and treatment options and possible complications of adolescent spinal deformities.

Keywords scoliosis
hyperkyphosis
spine deformity
surgical treatment
complications
conservative management

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
