

Special Issue

Maxillomandibular Growth, Reconstruction and Rehabilitation: Orthodontic, Prosthodontic and Surgical Interventions from Childhood to Adulthood

Message from the Guest Editors

This Special Issue focuses on maxillomandibular growth, reconstruction, and rehabilitation, exploring orthodontic, prosthodontic, and surgical interventions from childhood to adulthood. It explores the normal and abnormal growth patterns of the maxilla and mandible, aiming to gain a deeper understanding of craniofacial development. Surgical techniques for reconstruction after trauma or disease, along with prosthodontic rehabilitation methods, are covered. By integrating these aspects, the issue provides comprehensive strategies to address maxillomandibular problems at different life stages, improving patients' oral function and quality of life.✉

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
