Diagnosis and Treatment in Chronic Obstructive Pulmonary Disease

Message from the Guest Editor

Chronic Obstructive Pulmonary Disease (COPD) is a leading cause of morbidity and mortality worldwide. Even after decades of clinical progress, COPD remains a significant health burden. While management has focused mainly on airflow limitation and exacerbation prevention, critical gaps persist in early detection, precision phenotyping, and the care of complex comorbidities such as cardiovascular disease and pulmonary hypertension. The inherent heterogeneity of COPD is increasingly understood through biomarkers, and advanced imaging, which are redefining conventional phenotypes and enabling trait-based medicine. The integration of artificial intelligence, quantitative radionics, and innovative technologies offers transformative potential to shift toward a more symptom-centered, personalized care. For this Special Issue, we invite clinicians and clinical investigators to contribute high-impact articles that translate these insights into improved, patient-focused COPD care and inspire multidisciplinary collaboration.

About the Journal

Message from the Editor-in-Chief

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2026).
