Special Issue

Novel Therapeutic Strategies in Wound Healing and Skin Regeneration

Message from the Guest Editor

Non-healing wounds and skin loss are major healthcare problems around the world costing healthcare systems billions of dollars a year. Recent technologies such as tissue engineering, biomaterial science, and in situ 3D printing have significantly advanced the development of skin tissue mimetics with clinical potential. Novel therapeutic strategies enabled the development of split or full-thickness skin substitutes to recapitulate the native functional skin.

Furthermore, numerous therapies such as immune cell, stem/progenitor cell therapies, as well as micro RNA-and siRNA-based techniques, and gene editing tools have been investigated to improve wound healing. Recent emerging techniques can reveal the mechanisms of skin regeneration and have immense potential to radically revolutionize the current situation. In this Special Issue, we will publish research on various emerging and state-of-the-art approaches being developed and implemented for accelerating wound healing and skin regeneration.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
