Current Advances in Endodontics and Dental Traumatology

Message from the Guest Editor

While the progress in endodontics and traumatology is remarkable, various recent treatment methods, materials, and imaging approaches await thorough evaluation to fully elucidate their benefits for patients of all ages. In particular, regenerative and minimally invasive treatment options, along with possibilities to preserve pulp tissue, may facilitate better lifelong outcomes. Research on biocompatible and effective materials—especially those with antimicrobial and anti-inflammatory properties and those concerning density and stability at the interfaces between the pulp and the respective hard tissues—is of utmost importance.

Advanced in vitro models and imaging are just as crucial as well-designed clinical studies and efforts to gather big data to collaboratively gain deeper insights using artificial intelligence applications. Finally, action is needed to broaden worldwide recognition and the actual application of these specific techniques, beginning with enhanced educational efforts for undergraduate and postgraduate students.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
