## Safety in Spinal Surgery

### Message from the Guest Editors

In this Special Issue, we cover current topics on spinal deformity surgery and focus on the management of specific risks. Topics include the optimisation of intraoperative neuromonitoring techniques, correction techniques for idiopathic scoliosis, fusion strategies, growth-friendly instrumentation, the role of navigation and robotic-assisted surgery, cervical spinal deformity, congenital scoliosis, and neuromuscular scoliosis. We hope that the broad scope and specific topics covered in this Special Issue will strengthen the delivery of safe spinal care by the multidisciplinary team for the benefit of our patients.
