New Advances in Retinal Diseases

Message from the Guest Editor

Recent advances in retinal disease research and treatment have significantly improved our understanding of retinal pathophysiology and offered novel therapeutic approaches. However, critical challenges remain, such as identifying early biomarkers, developing less-invasive treatment options, and addressing global disparities in access to care. This Special Issue aims to highlight cutting-edge research, including but not limited to imaging advancements, new pharmacological interventions, and surgical innovations. Contributions exploring the clinical diagnosis and treatment of retinal diseases, such as age-related macular degeneration, diabetic retinopathy, and inherited retinal disorders, are encouraged. This Special Issue also seeks papers addressing the integration of artificial intelligence into diagnosis and management, as well as insights into patient-reported outcomes and quality of life. We invite researchers, clinicians, and scientists to submit original research articles, reviews, and clinical studies that tackle pressing challenges in retinal disease care and pave the way for innovative solutions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
