Degenerative Spinal Disease: Clinical Advances and Perspectives

Message from the Guest Editor

Degenerative spinal disease is one of the most prevalent conditions encountered throughout life, with its incidence sharply rising with age. This condition significantly impacts the quality of life in elderly patients, prompting the development and implementation of numerous diagnostic and therapeutic approaches by healthcare professionals. The importance of clinical research in this area cannot be overstated. In this Special Issue, "Degenerative Spinal Disease: Clinical Advances and Perspectives", of the *Journal of Clinical Medicine*, we are seeking research from various clinical fields that focus on degenerative spinal disease.

We invite authors to submit their work to this Special Issue, with an emphasis on the recent clinical advances and perspectives in managing degenerative spinal disease. We hope this collection of research will contribute to improving the quality of life for those affected by this condition.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
