

Special Issue

Advances in Hypertension and Related Complications

Message from the Guest Editors

Hypertension, a public health challenge affecting approximately 1.13 billion people globally. It is a leading cause of cardiovascular diseases. The prevalence of hypertension continues to rise, highlighting the urgent need for innovative and effective solutions. This Special Issue endeavors to publish scientific articles that elucidate the advancements in the field, with an emphasis on mitigating the incidence and severity of hypertension-related complications. Topics of particular interest include methodologies for detection, novel therapeutic approaches, treatment paths, and strategies for managing the complex interplay between hypertension and other chronic conditions. By disseminating these advancements, this publication aims to enhance clinical practices and ultimately reduce the global burden of hypertension and its associated complications.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
