Special Issue

Progress in the Surgical Treatment of Pancreatic Disease

Message from the Guest Editor

Surgical interventions play a crucial role in the management of pancreatic diseases. Pancreatic diseases, such as pancreatic cancer, pancreatitis, and pancreatic cysts, often pose serious health risks and require surgical treatment for optimal patient outcomes. Surgical procedures for pancreatic diseases encompass a range of techniques, including the Whipple procedure, distal pancreatectomy, and minimally invasive approaches like laparoscopic surgery. These procedures aim to remove tumors, treat infections, alleviate pain, or restore the normal function of the pancreas. However, surgical interventions in pancreatic diseases are complex and carry inherent risks, such as postoperative complications and the potential for disease recurrence. Therefore, a multidisciplinary approach involving surgeons, oncologists, gastroenterologists, and radiologists is crucial for comprehensive patient care. Early detection, accurate diagnosis, and appropriate selection of patients for surgery are essential to achieve optimal outcomes. We look forward to receiving your submissions to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
