

## Special Issue

# Complex Scenarios in Reverse Shoulder Arthroplasty: Bone Loss, Revisions, and Surgical Solutions

### Message from the Guest Editors

This Special Issue is dedicated to exploring the current state and future perspectives of shoulder prosthetic surgery, with a particular focus on reverse shoulder arthroplasty in complex cases, both as primary implantation and revision procedures. Special attention will be given to the management of humeral and glenoid bone defects, the surgical techniques used to address these complications, and the decision-making process in such demanding cases. The issue will also explore implant selection in difficult anatomical scenarios, clinical outcomes, complication management, and strategies for optimizing results in revision surgery. This Special Issue aims to provide shoulder surgeons and orthopedic specialists with comprehensive insights into the indications, challenges, techniques, and outcomes of complex reverse shoulder arthroplasty, fostering the exchange of experience and evidence in this rapidly evolving field.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
