# Recent Advances in the Management of Colorectal Cancer

### Message from the Guest Editors

We are glad to announce a new Special Issue entitled “Recent Advances in the Management of Colorectal Cancer” for the Journal of Clinical Medicine. Colorectal Cancer (CRC) ranks as the third most prevalent form of cancer globally and represents a significant contributor to cancer-related deaths. In recent years, the management of colorectal cancer has made significant advances. This has been achieved, on the one hand, due to the thorough research conducted on colorectal cancer by clinicians, surgeons, and pathologists; on the other hand, significant progress has been achieved in conjunction with advancements in surgical techniques, the accumulation of surgical expertise, and the implementation of multidisciplinary treatments. The aim of this Special Issue is to present recent advances in the multidisciplinary approach to colorectal cancer and the assessment of clinicopathological patterns in colorectal cancer. Therefore, we kindly invite you to contribute to the topics of this Special Issue and submit your manuscripts (review or original), in order to enhance and update the scientific knowledge related to this fascinating field.
