Special Issue

Clinical Treatment of Vitreoretinal Disorders: Current Updates and Perspectives

Message from the Guest Editor

In recent years, vitreoretinal surgery has seen exponential advancements, largely attributed to the development of surgical instruments, ancillary equipment, and the introduction of numerous new surgical techniques. As a result, expectations regarding surgical outcomes and postoperative visual functions have risen. To meet these escalating expectations, it is imperative not only to enhance the surgeon's individual skills but also to master the use of surgical instruments and ancillary equipment. Additionally, the flexibility to adopt and implement new techniques that leverage these tools is crucial. Therefore, this Special Issue aims to explore the future of vitreoretinal surgery, and we widely encourage authors to submit articles related to the following topics: (a) examination of new techniques in vitreoretinal surgery; (b) novel clinical approaches in vitreoretinal surgery using heads-up surgery; (c) novel clinical approaches to vitreoretinal surgery using intraoperative OCT; (d) new insights and clinical approaches regarding surgical instruments and peripheral devices; and (e) other reports related to vitreoretinal surgery.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
